SOLDENSO

ADVANTAGES

ASPE RECOMMENDS GEL FORMULATION INSTEAD OF NPK WATER SOLUBLE POWDER:

- SOLDENSO** It's a formulated nutritional product and **NOT JUST A SIMPLE MIXTURE OF RAW MATERIALS**, as are most of NPK fertilizers in powder form.
- SOLDENSO HAS AN UNIFORM AND SIMULTANEOUS SOLUBILITY OF ALL THE NUTRIENT**, during use, while avoiding sedimentation in the storage containers of the nutrient solution. In contrast, common NPK water soluble powder fertilizers, which are produced through a mixture of raw materials, have increase variability in grain size that results in a non-uniform dilution of nutrients, since the smallest grains are dissolved firstly.
- THE CONDUCTIVITY AND THE SALINITY INDEX OF SOLDENSO ARE MAINTAINED IN VERY LOW LEVELS**, so that the soil will not be burdened with undesirable, salt concentration.

Packing

SOLDENSO

CHARACTERISTICS

1. **NEUTRAL pH**, unlike most liquid foliar are highly acidic or highly alkaline. SOLDENSO can be used at higher doses, not being aggressive with the cells that form stomas.

2. **More COMFORTABLE for the farmer to DOSING** per volume instead of on weight.

3. Best solution in terms of speed and ease to use. **Allow HIGHER LIQUID DISPERSION**, homogeneity than solid products.

4. **Guarantee SOLUBILITY** by its GEL formulation.

5. **ADJUVANT:** Promotes effectiveness of plant protection products when applied jointly.

6. **MULTIPLE FORMULAS** for different crops and different stages of growth.

SOLDENSO CHARACTERISTICS

GREATER PERSISTENCE
BETTER UPTAKE
HIGHER EFFICIENCY

SOLDENSO FORMULATIONS

**SOLDENSO
YELLOW GEL**

- SOL Denso Equal 27-27-27+Te
- SOL Denso Equal 25-25-25+Te
