pH  6,7  
Density  1,16

**STYM 25** is a natural bioactivator based on Amino acids obtained through enzymatic processes, making **STYM 25** more efficient than chemical process based products. It is recommended for all crops and all times, especially when the plants need more nutrients such as in pre-blooming, setting, the swelling of the fruit, vegetative growth, for saline or climatic conditions etc. Aspe has developed a group of molecules that we call I.S.I. capable of acting as DISEASE RESISTANCE ACTIVATORS.

**INCREASE**

- **Yield**
- **Nutrients uptake**
- **Root system**
- **The seed germination**
- **Immunological system action of the crops**

Foliar application of **STYM 25** can increase amino acid and peptide availability for plant uptake by reducing the competition with soil microorganisms.

**Packing**

- 1L
- 5L
- 20L
- 200L
- 1000L
