KELOM FOLIAR N36Aa is a nitrogen solution with low biuret content, enriched with sulfur, amino acids and organic matter. It is a suitable nitrogen source in times of active crop growth to boost its development. The amino acids and the organic matter incorporated increase plant growth and produces substances with physiological action that enhances crop nutrition.

**COMPOSITION**

**CHARACTERISTICS**

- Completely soluble foliar fertilizer with fast absorption.
- High nitrogen content.
- Recommended in sprouting and active growth.

**APPLICATIONS**

**FRUIT TREES AND OLIVE**

From the beginning of the sprouting up to one month before harvest.

- FERTIRRIGATION: 1-2 L/Ha and irrigation to complete 10-20 L/Ha year.
- FOLIAR: 200-250 CC/HL in 6-7 applications.

**HORTICULTURAL AND STRAWBERRIES**

From 15 days after transplanting to one month before harvest.

- FERTIRRIGATION: 2L/Ha per week.
- FOLIAR: 150-200CC/HL in various applications.

**CITRUS**

In spring and summer.

- FERTIRRIGATION: 1-1,5 L/Ha per week.
- FOLIAR: 150-200 CC/HL in 4-6 applications.

**VINE AND GRAPES**

Since the beginning of shooting to veraison.

- FERTIRRIGATION: 1-1,5 L/Ha by irrigation making 3-4 applications.
- FOLIAR: De 150-250 CC/HL in 4-5 applications.

**ADVANTAGES**

- Promotes vegetative growth, development and increased production
- Fast and prolonged nitrogen supply
- Revitalizing and stimulating effect
- Promotes the absorption of macro and microelements
