Color K is a concentrated formulation containing potassium and nitrogen. The presence of EDTA increases the efficiency by improving the availability of potassium in the plant when it most needs it. RECOMMENDED FOR ALL TYPES OF CROPS.

Color K helps the plant create a leaf environment uninviting to leaf pathogens such as podery midew and botrytis.

**COMPOSITION**

<table>

**THE PRODUCTION**

**CROPS DOSAGE**

- **Citrus Fruits:** 2-4 treatments during the crop's life cycle.
- **Cotton:** 2-4 treatments during the crop's life cycle.
- **Fruit Trees:** Apply when the fruit is setting, swelling and before harvesting.
- **Grapes:** Apply when the fruit is swelling, ripening and gaining colour.
- **Horticultural Crops:** 2-6 applications throughout the crop's vegetative cycle.
- **Olive Trees:** Apply when the fruit is setting, swelling and before harvesting.
- **Strawberries:** 1-3 treatments during flowering, fruit formation and formation of the tubers.
- **Sugar Beet:** From 2 months before harvesting and onwards.
- **Tropical Fruits:** 2-4 treatments during the crop's life cycle.

**DILUTION:** Recommended water rate is 500-1500 Litres per hectare. **Always shake the container before opening.**
