**CHARACTERISTICS**

KELOM PhosCu is a plant defense inductor and copper deficiency corrector enriched with phosphorus in the form of phosphite ion. The combined application of copper and phosphite ion allows on a single application to prevent copper deficiency at the same time strengthens the plant against the presence of parasitic fungi. Besides its high phosphorus content makes it an ideal complement for fertilization in flowering time or transplantation.

Increases the resistance of plants to environmental, nutritional and/or pathological critical situations.
